## TAP INTO A NEW POSSIBILITY for depression

[Visit NeuroStar.com](http://VisitNeuroStar.com)

### Introducing the D-Tect™ MT Accessory:

Neuronetics is pleased to announce the FDA clearance of the D-Tect™ MT Accessory by NeuroStar. The technology aids providers by visually reporting and comparing the magnitude of a patient's response during the MT determination process, offering a new streamlined experience when treating patients.

The new D-Tect™ device is Neuronetics' latest innovation to simplify the entire MT process and can be used in combination with NeuroStar's MT Cap and Fast MT delivering an average time savings of 40% for you and your staff.

#### Why is D-Tect going to make your life easier?

- Does not require cords or sensors to be attached to the patient
- Designed to recognize hand movement in three areas
- Only requires 1 person for MT determinations

The D-Tect MT Accessory is compatible across all NeuroStar systems. Contact your Practice Development Manager (PDM) or Strategic Account Manager (SAM) to purchase: [systemuser.internalemailaddress](mailto:systemuser.internalemailaddress)

### September is National Suicide Prevention Month:

Suicide is the leading cause of death in the U.S. and is a difficult subject for many individuals and families. This month, we will highlight Drew Robinson's story to spread awareness about NeuroStar TMS as a treatment option for depression.

Drew survived a suicide attempt, and today is a NeuroStar patient and advocate. Together, we are partnering to help patients and providers understand the importance of sharing the possibility of TMS with those who need it most.

#### How you can help:

Share Drew's story and let your patients know all their treatment options.

Create co-branded social media posts with NeuroStar and Drew today using our ready made templates!

### TrakStar Tip of the Month:

How valuable would it be to promote your own Practice's NeuroStar outcomes? TrakStar makes it easy to access your outcomes report at any time. Simply click **Tools > Practices > Outcomes Reports**. Customize your report by selecting specific clinical, patient, time range, and practice parameters. Assign patient surveys in TrakStar to automatically load in your outcomes reporting.

### Customer Education Series:

Wednesday, August 31st, NeuroStar hosted a new Customer Education Series, *Tapping into your Existing Patients*. With over 150+ registrants, our hosts Dr. Melissa Fickey, Michael Dib, Chris Gilbert, and Kevin Donahue were able to provide a comprehensive look into best practices for integrating PHQ-10 into a practice. Contact your PDM or SAM to get all the details!

Don't miss the next webinar in the series, register today!

### MyNeuroStar Marketing Resources:

#### NEW Brochure available!

Let your patients know *What to Expect*

This brochure educates patients on the benefits of completing a full course of NeuroStar TMS. With a clear understanding of what to expect, patients will be more likely to complete their prescribed 36 treatment sessions.

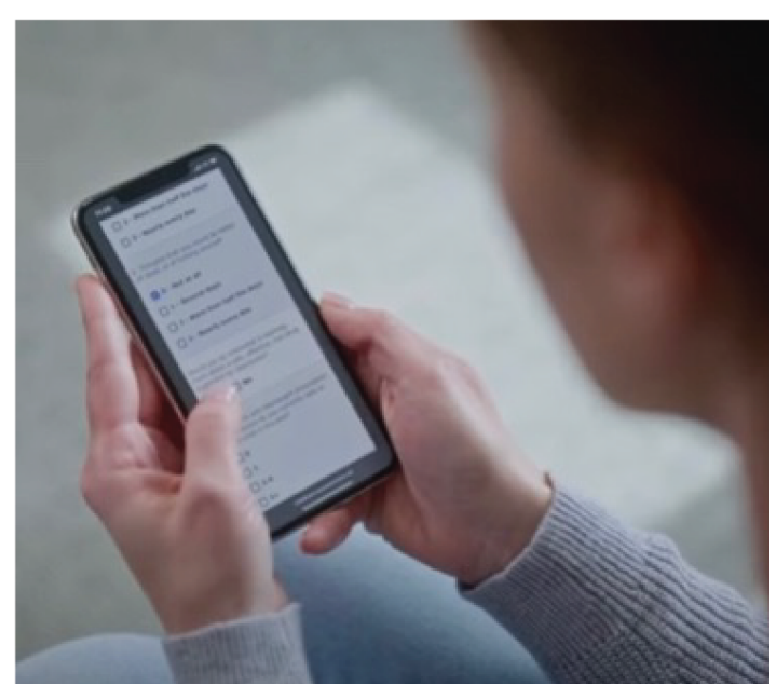

Check out the digital brochure on [myneurostar.com](http://myneurostar.com).

### Star Connection

Stay tuned for October's edition of Star Connection featuring National Depression Awareness Month initiatives and new outreach templates to connect with your NeuroStar patients. If you would like additional people in your practice to receive this newsletter, please contact your PDM or SAM.

Depression Isolates. *NeuroStar Connects.*

NeuroStar Advanced Therapy is only available by prescription. A doctor can help decide if NeuroStar Advanced Therapy is right for you. Patients' results may vary. The NeuroStar Advanced Therapy System is indicated for the treatment of depressive episodes and for decreasing anxiety symptoms for those who may exhibit comorbid anxiety symptoms in adult patients suffering from Major Depressive Disorder (MDD) and who failed to achieve satisfactory improvement from previous antidepressant medication treatment in the current episode.

The NeuroStar Advanced Therapy system is intended to be used as an adjunct for the treatment of adult patients suffering from Obsessive-Compulsive Disorder (OCD).
